PROFESSIONAL SUMMARY

AWS-certified DevOps Engineer with 3.5+ years of experience in designing and managing scalable and secure DevOps environments across AWS and hybrid cloud. Skilled in Kubernetes (EKS, OpenShift), infrastructure-as-code (Terraform, Helm), and CI/CD tools like GitHub Actions and Jenkins. Automated deployments and infrastructure provisioning, leading to a 70% improvement in deployment speed and 60% system uptime gain. Delivered robust GitOps and monitoring solutions while mentoring teams and maintaining high-availability enterprise systems.

TECHNICAL SKILLS

Cloud: AWS, Azure, GCP

Containerization: Kubernetes, OpenShift, Docker, Containerd, EKS, ECS, Azure App Service, Docker Swarm, Cloud Run
Infrastructure as Code and Security: Terraform, Helm Charts, CloudFormation, Vault, SSL/TLS, Key Management, Sonarqube, WizCLI

Configuration & CI/CD Automation: Ansible, GitHub Actions, Jenkins, Azure Pipelines, Argo CD, Flux CD, Kustomize, GitLab CI, Nginx, Teamcity

Monitoring & Observability: Prometheus, Grafana, Cloudwatch, Splunk, Langfuse

Programming language & Development: Python, YAML, Bash Shell, PowerShell, SQL

Version Control: Git and GitHub

Databases: MySQL, PostgreSQL, MongoDB, Elasticsearch

Operating System: Linux, Windows

PROFESSIONAL EXPERIENCE

ZS Associates – Pune, Maharashtra

Associate Consultant DevOps

Oct 2025 – Present

- Architected secure cross-network code migrations for **15+ enterprise repositories** using GitHub Actions and SonarQube, pitching the architecture to Principal stakeholders to secure alignment.
- Implemented a reusable Terraform framework to standardize AWS infrastructure provisioning across 20+ ECS clusters, **accelerating application onboarding time by an estimated 40%** for data analytics ecosystems.
- Directed the deployment and operations of **3+ AWS EKS clusters** for a top pharmaceutical enterprise, streamlining cross-functional delivery between development, security, QA, and operations teams.
- Designed **SOC2 and HIPAA-compliant** cloud architectures using Azure App Service, configuring Azure Front Door and advanced DNS routing to guarantee low-latency delivery and strong WAF protection at the edge.
- Provisioned end-to-end infrastructure for **4+ enterprise clients** and prototyped **5+ internal Proof-of-Concept (POC)** products to drive new client acquisitions including a Docker-containerized Generative AI application on AWS Bedrock. Leveraged Inference Profiles and Langfuse for advanced LLM observability, deploying the architecture behind scalable Load Balancers via Azure Pipelines.

Cognizant Technology Solutions – Pune, Maharashtra

Cloud DevOps Engineer

Oct 2022 – Sept 2025

- Migrated Apache Airflow workloads from Docker to AWS EKS, mitigating job execution time by **40%**, cutting manual intervention by **60%**, and enhancing system resilience for production pipelines.
- Administered and optimized over **200+ Kubernetes deployments** across **15+ EKS clusters** for a major healthcare client (Merck), minimizing deployment bottlenecks by **80%** and ensuring high availability in production.
- Orchestrated infrastructure provisioning and configuration utilizing Kustomize, Helm Charts, and Terraform, reducing manual errors and **deployment time by 70%**.
- Deployed an observability stack using Prometheus, Grafana, and CloudWatch for Airflow, reducing Mean Time to Resolution by 50% and **augmented system uptime by 60%** through real-time alerting and expedited issue resolution.
- Integrated DBT infrastructure on EKS via CI/CD and Terraform, enhancing release cycles by up to 80% and system reliability by up to 90%.
- Enforced Kubernetes version upgrades, Fargate Pod Eviction and compliance audits via GitHub Actions and Python, boosting release consistency and **security compliance by 40%**.
- Led customer-facing incident and change management processes via ServiceNow during on-call rotations, ensuring strict adherence to SLAs and rapid resolution for mission-critical applications.
- Mentored **10+ Junior engineers** on K8s adoption, conducting hands-on POC's and training sessions, documented processes, architecture diagrams, and best practices, improving cross-team collaboration (JIRA).

Cognizant Technology Solutions – Remote

DevOps Intern

Mar 2022 – Sep 2022

- Streamlined Linux server provisioning using Ansible playbooks, enhancing deployment speed, eliminating manual configuration errors, and improving operational efficiency.
- Engineered and containerized a machine learning-based Diabetes Prediction application, improving deployment speed and scalability using Docker & Kubernetes.

EDUCATION

Poornima College of Engineering – Jaipur, Rajasthan

Apr 2018 – Apr 2022

Bachelor of Technology (Honors), Computer Science; Cumulative GPA: 8.9/10

AWARDS AND CERTIFICATIONS

- Certified in [AWS Solution Architect Associate](#) and AWS Certified Cloud Practitioner.
- Certified in **AWS Agentic AI Demonstrated** and **AWS Serverless Demonstrated Microcredentials**.
- Received "**Digital Excellence**" recognition from client stakeholder (Pfizer).
- Received Cognizant's 'Doing the Right Thing' Award for executing IaC using Terraform, Kustomize, Helm Charts, standardizing and automating the entire provisioning process that reduced **manual error by 80%**.
- Airflow Fundamentals & DAG Authoring | Azure Global Certifications (AZ-900, DP-900, AI-900) | 5-star Rating in Python.
- Trained in Red Hat Certified Linux, Terraform Associate, CKA Training, and GCP Core Infrastructure.
